Subject: Clean up after Asbestos Exposure/ Contamination

Mr. Bishop,

Thank you very much for your time and education on the necessary clean up procedures following the asbestos exposure in our condo prior to us being able to safely return home.

Also, thank you for the information about the existence of companies which specialize in what we need, disaster clean up, which are also known as biohazard clean up and hazardous substance removal. We will definitely contact them for assistance. Every company I have contacted solely does work in containing areas where asbestos containing materials are being disturbed, not the "clean up" from improper or lack of containment and abatement.

I look forward to receiving the documents you mentioned providing asbestos clean up protocols and guidance, including the ORD documents. As I am sure you can imagine, we are very anxious to be able to again be able to safely access our home.

Regards,
